

# CONSULTATION MANAGER

in the WATER SECTOR

Sydney  
**WATER**

**Sydney Water**, Australia's largest water utility, supplies infrastructure and services to some 4.6 million people. CM is used across all new projects and maintenance works, to provide a central source of intelligence for internal teams, consultants, and contractors. Major projects include the **\$210m West Dapto Urban Release Area** and the **\$90m Green Square Stormwater Drain project**.

South East  
Water

**South East Water** provides water and sewerage services to 1.3 million Victorians. CM is used as a risk mitigation tool by teams and contractors managing data across services and projects. Current projects include the **\$375m Peninsula ECO** project, involving more than **16,000 properties**.

seqwater  
WATER FOR LIFE

**Murrumbidgee Irrigation (MI)** provides a wide range of irrigation and drainage services to the Murrumbidgee area. CM is a key component of multi-team project strategy, ensuring responsive communication and information sharing. Notable projects include a **\$92m total infrastructure modernisation** project, delivered by an alliance of **MI, John Holland, GHD, and UGL**.

WATER  
CORPORATION

**Water Corporation** supplies water, wastewater and drainage services across the vast state of Western Australia. CM is used to manage key account relationships, with over 100 users and 30,000 key stakeholders. Current projects include the **\$124b Groundwater Replenishment Scheme**, which will recharge **14 billion litres of recycled water** for drinking per year.
